ENGINEER CLAIMS "SAUCER" PLANS ARE IN SOVIET HANDS; SIGHTINGS IN AFRICA, IRAN, SYRIA

Newspapers as indicated.

GERMAN ENGINEER STATES SOVIETS HAVE GERMAN FLYING SAUCER EXPERTS AND PLANS --Athens, I Vradyni, 13 May 53

Vienna (Special Service) -- According to recent reports from Toronto, a number of Canadian Air Force engineers are engaged in the construction of a "Thying saucer" to be used as a future weapon of war. The work of these engineers is being carried out in great-secrecy at the A. B. Roc Company firenaliteration from the Greek's Rotories.

"Flying saucers" have been known to be an actuality since the possibility of their construction was proven in plans drawn up by German engineers toward the end of World War II.

Georg Riein, a German engineer, stated recently that though many people believe the "Tlying saucers" to be a postwar development, they were actually in the planning stage in German sirersft factories as early as 1941.

Ricin said that he was an engineer in the Ministry of Speer probably refers to Albert Speer, who, in 1942, was Minister for Arament and Amaunition for the Third Reich] and was present in Prague on 14 February 1945, at the first experimental flight of a "flying saucer."

During the experiment, Minim reported, the "Mying sauser" reached an altitude of 12,000 enters within 3 minutes and a speed of 2,000 kilometers por hour. Mean emphasized that in accordance with German plans, the speed of these "sausers" would reach 9,000 kilometers per hour. One difficulty, according to Riein, was the problem of obtaining the materials to be used for the construction of the "sausers," but even this had been solved by German engineers toward the end of 19%5, and construction on the objects was scheduled to begin, Mein added.

Klein went on to state that three experimental models had been remained for tests by the end of 1984 [fist], built seconding to two completely different principles of serodynamics. One type sectually had the shape of a disc, with an interior cabin, and was built as the Mitte [midentified; transliteration from the Greek] factories, which had also built the V2 rockets. This model was \$\frac{1}{2}\$ meters in diameter. The other model had the shape of a ring, with reised sides and a spherically shaped pilot's cabin placed on the outside, in the center of the ring. This model was built at the Sabarmol and Schreiver factories [midentified] both amms transliterated from the Greek].

Both models had the ability to take off vertically and to land in an extremely restricted area, like helicopters.

During the last few days of the war, then every hope for derman victory had been abandoned, the estimeers in the group stationed in Frague carried out orders to destroy completaly. All their plans on their model before the Soviet forces arrived. The engineers at the Hite factories in Fracian, however, were not warmed in sufficient time of the Soviet spreads, and the Soviets, therefore, succeeded in setting their material. Flans, as well as specialized personnel, were immediately sent directly to the Soviet Union under heavy guard, coincidental with the departure from Berlin of the creator of the Stuta, Jun-57 dive bonders, who have developed the Min 33 stat 15 in the Soviet bulion.

According to the report, nothing is known of the whereabouts of Harmermal since his diseppearance from Frague; Schreiver died recently in Bremen; and bite, who escaped in a Messerschmitt 163, is in the US.

Klein was of the opinion that the "samers" are at present being constructed in accordance with German technical principles and expressed the belief that they will constitute serious competition to jet-propelled simplanes.

Rien further stated that it was very possible to construct "flying same cars" for civilian air thread the flow could carry 30-th passengers at a speed of \$,000 kilometers perform: Fe added lonewers, that the treendous amount of material necessary for music construction did not varyant their being built exclusively for civilian air travel. His opinion was shared, he stated, by Gluseppe Bellumso, the Italian specialist with whom Klein has been corresponding for some time.

DELAYED REPORT ON FOUR "SAUCERS" SEEN IN UBANGI-SHARI -- Brazzaville, France-Equateur, 11 Mar 53

The Meteorological Service of French Equatorial Africa has authorized this new space to publish today the following account about four "flying saucers" seen on 22 Hovember 1952 over Bocarange, Dhanj-Shari.

At approximately 2200 hours, Father Carlos Maria, (a Sapuchin missionary), Lasinons, his companion, and four other persons were driving on the road Bocarnage, when they suddenly noticed a large disc travelling overhead in the Bocarnage, when they suddenly noticed a large disc travelling overhead in the discapeared in the distance. A short while later, in the same spot, they saw four discs most collections in the dir. Pather Marigh *description follows:

We could see them clearly. Two were above and two below, but all four had no point of contact. At that meant, they fad a silvery color like that of the moon. I would say that their disaster was somewhere between 30 and to centimeters.

They moved several times, but seek time it seemed that only the tou lower cone were retaining. Just before they fill four) began to save, they lit up brightly, like sums. Them it looked as though they arranged themselves to move in circular familion so as to return to their starting point. On stopping, they lost their brilliant colors and registed the silvery one. During their rotation, they seemed slightly owal. I cannot say whether it was due to a new shape they assumed while in flight or to the oblique position they had assumed this moving. Each time they turned, they had that shape and that profusion of light. He observed has their intitled position for several moments. Then they disappeared, headed in the direction from which we had come. What I see was no serolite, shooting star, or anything of the kind. It could only have been a man-sade sacking.

Lasimone' then gave an equally detailed version, as follows:

"At about 2200 hours, we observed four halos of silvery light grouped in a square formation and located above light clouds. The night was very clear-

"At one point, the four balos were on the horizon, ranged in a line in, the direction of Bousous. Buddenly, one of them lit up in wivid red, causing its shape to be distinguished. It was like a cigar, thicker in the fore section. The center section constituted about one third of the total length, and speared opaque in the light, with perfectly symmetrical lines. Thying above the clouds, this object headed in our direction at coinciderable speed, shout equal to that of an everage plane. About 5 or kilometers sway, it balted without change line because saltway again. The other three on the horizon then begun to more in the same very as the first and joined it to form a square once again."

REPORT "PLYING SAUCERS" SEEN IN SYRIA -- Athens, Le Messager d'Athenes, 19 May 53

The Damascus newspaper Al Ahaya reports that "flying saucers" were seen recently above the city of Homs, Syria, coming from the south.

LIMINOUS OBJECT SKEN IN SKY OVER ABADAN -- Tehran, Etela'at, 20 May 53

This savapaper was informed by its correspondent in Abadan that at 1855 hours, on 18 key 1933, a luminus object was seen in the sky over Abadan. The object was reported to be as bright as the sun and to have the shape of a new zoon (but several times larger than a new zoon). It traveled extremely fast and could be seen for 20 zinutes. It was also reported that the same object was seen over all the old areas in Runistan.
